01 about us

Since **1970**, founded by Elias M. Kamchis, ‘Kamchis Shading Systems’ is a leading provider of innovative shading solutions for hotels, residential and commercial buildings, offering a range of products and services designed to enhance the comfort and energy efficiency of buildings while also providing privacy and sun protection.

Our team of experts has years of experience in the shading industry, and we pride ourselves on delivering exceptional customer service and high-quality products that meet the unique needs of each of our clients. We work closely with architects, structural companies, hotels, contractors, and homeowners to design and install shading systems that are both functional and aesthetically pleasing.

01 about us

At ‘Kamchis Shading Systems’, we are committed to sustainability and environmental responsibility. Our products are designed to reduce energy consumption and promote a healthier living environment. We offer a variety of shading solutions, including tensile membrane structures, motorized awnings, umbrellas, bioclimatic pergola systems, internal blinds, and solutions for facade architecture, all of which are customizable to fit the unique needs of your home, business, or hotel.

Since 2022, our company is also a proud member of **Architectural Membrane Association (AMA).**

04 milestones

- 1970 Kamchis Shading Systems is founded by Elias Kamchis. The top-level quality of products and services attracts a big range of clients among which architectural offices, hotels, commercial buildings and private houses.

- 1996 Our company introduces the exclusive collaboration with the Austrian company *Wo & Wo*, known for their high-end shading systems. The collaboration includes the import, assembly and installation of the systems.

- 2005 David Kamchis is the new Managing Director of the company with a clear plan: Kamchis Shading Systems will be one of the most recognizable firms in the Greek market, offering high-end solution to their clients.

- 2007 Two more, top-class, European manufacturers are added to our product portfolio: *Giulio Barbieri* (Italy, known for pergola systems and event solutions) and *Caravita* (Germany, known for their high-tech umbrellas)

- 2010 Our company is certified as ‘Somfy Expert’ by Somfy, the world’s biggest motor producer.

04 milestones

- 2012 Kamchis Shading Systems is now offering turn-key-solutions for architectural tensile structures, after completing a two-year MSc course in the Bauhaus University (IMS) in Anhalt, Germany.

- 2019 Our company is moving to its new, owned, 900m2 building in Moshato. This allows us to make our production faster and the quality control even better. Showroom and offices are also settled in the same building.

- 2022 After completing some very demanding ‘tensile membrane’ projects, we are now a formal member of the AMA (Architectural Membrane Association).

- 2024 We are introducing our collaboration with *Gibus,* Italy’s top manufacturer in bioclimatic pergolas and shading systems. The collaboration includes the promotion of the systems in the Greek market, as well as the import and installation.

- 2025 Our company signs a significant contract with Fraport Greece, which gives us the opportunity to install our high-end pergola systems in nine (9) airports across Greece.

05 product range overview

- tensile membrane structures
- external shading systems
- façade shading systems
- weather-protection systems
- interior shading systems

05 tensile membrane structures

Our company specializes in the design and implementation of tensile membrane structures, offering advanced solutions for lightweight architectural structures.

Combining innovative engineering with high-performance materials like PVDF, ETFE and PTFE, we deliver custom shading and architectural solutions that are both functional and visually striking.

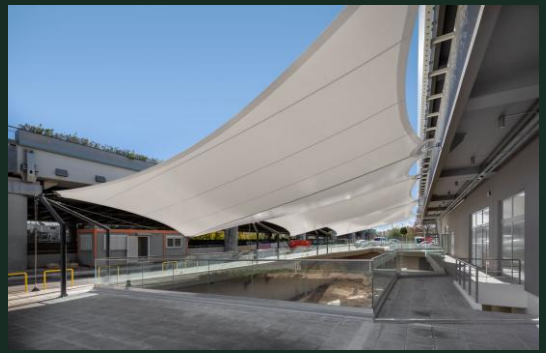

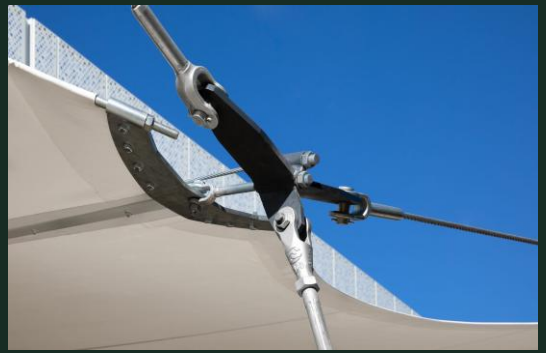

05 tensile membrane structures

As a member of the Architectural Membrane Association (AMA), we uphold the highest industry standards and continue to push the boundaries of textile-based architectural design, trusted by architects, developers, and engineers alike.

Our extensive experience allows us to deliver turn-key projects which include:
consulting / proposals and 3D designs / structural engineering / detailed design and fabrication of the membrane / detailed design and fabrication of the metallic structures / project management / top-quality installation
